at the Summercourt Community Village Hall, TR8 5DY
– note NEW VENUE just off the A30 near Mitchell/Fraddon**

Hedgehog by Dr Pat Morris

Professor Fiona Mathews will discuss the latest evidence on the conservation status of hedgehogs in Britain, and assess what we know, and what we need to find out, about the causes of their decline.

Fiona is Professor of Environmental Biology at the University of Sussex and Chair of The Mammal Society. She warns that hedgehog numbers could have dropped by as much as a half over the past five years, and heads up a major new survey into their current population levels.

**Hot drinks and home baked cake also provided
Members: £1.50 Non-Members: £3.00**
